

# LSSIP 2019

## BOSNIA & HERZEGOVINA

### LOCAL SINGLE SKY IMPLEMENTATION

Level 1 - Implementation Overview

# FOREWORD

*"We manage a seamless European airspace by linking together the elements of the European air traffic management system. Focusing on performance of the European network, we ensure that flights reach their destination safely, on time, with the least possible impact on environment and in a cost-efficient way".*

With this mission, as Director NM, I must ensure to develop and operate effectively and efficiently the air traffic management network in Europe and beyond, to meet current and future airspace and ground capacity needs, in full partnership with all operational stakeholders.

In particular, one of the NM activities through the Infrastructure Division, is to focus on the planning and monitoring of the European ATM implementation of the SES objectives at the local level according to EU legislation.

For more than 26 years, the Local Single Sky ImPlementation (LSSIP) documents are expressing yearly the commitment of civil and military national organisations (Regulators and National Supervisory Authorities), Air Navigation Service Providers and Airport Operators, towards the implementation of the European ATM Master Plan (Level 3).

These documents provide an extensive and harmonised picture, for the benefit of the ATM community at large, of how all ECAC States as well as States having a Comprehensive Agreement with EUROCONTROL, and stakeholders concerned, are progressing in planning and deploying the mature elements of the European ATM Master Plan and the European aviation policies.

The reliability and quality of the data provided by the national stakeholders is of such a high quality that it allowed, for the fifth consecutive year, for the information in the LSSIP documents to constitute the sole source of information for the development of ICAO's Aviation System Block Upgrades (ASBUs) Implementation Monitoring Report in the ICAO EUR Region. EUROCONTROL undertakes this work, on behalf of ICAO, for all 55 ICAO/EUR States in accordance with the Global Air Navigation Plan (GANP).

In addition, EUROCONTROL is developing efficient practices to avoid unnecessary duplication of reporting. We are cooperating with the SESAR Deployment Manager, the SESAR Joint Undertaking, the European Defence Agency and NATO on optimising the reporting mechanisms for relevant stakeholders by collecting some of the information needed on their behalf through the LSSIP process.

I would like to thank all the stakeholders for their engagement and substantial effort spent in contributing to the production of this LSSIP document. I see this as a proof of commitment to the principles of transparency and partnership, to the benefit of the entire ATM community!

I wish you a good read!

**Jacopo PRISSINOTTI**

**Director NM – Network Manager**

**EUROCONTROL**

# APPROVAL SHEET

The following authorities have approved all parts of the LSSIP Year 2019 document and the signatures confirm the correctness of the reported information and reflect the commitment to implement the actions laid down in the European ATM Master Plan Level 3 (Implementation View) – Edition 2019.

Stakeholder / Organisation	Name	Position	Signature and date
BHDCA	Željko TRAVAR	Acting Director BHDCA	 18.03.2020.
BHANSa	Davorin PRIMORAC	Director of BHANSa	 16.03.2020
MoD	Sifet Podžić	Minister of Defence	 17.03.2020
Airport Sarajevo	Armin KAJMAKOVIĆ	General Manager	 17.03.20.

# Executive Summary

## National ATM Context

Member State of:

1

Bosnia and Herzegovina is an ICAO, ECAC, EUROCONTROL, ECAA and JAA Member State.

Bosnia and Herzegovina ratified the European Common Aviation Area (ECAA) Agreement and signed a working arrangement (WA) with EASA thus accepting the obligation to implement European Union regulations in the civil aviation area.

The Bosnia and Herzegovina Directorate of Civil Aviation (BHDCA), as an authority responsible for performing regulatory functions and oversight in the areas of civil aviation and air navigation, was established in 1997. It is only civil aviation authority responsible for registration of aircraft and issuance of certificates, licenses, approval, ratings and endorsements in the area of civil aviation.

Bosnia and Herzegovina National Supervisory Authority (The NSA Unit) is embedded in BHDCA.

BHDCA provides for constant implementation of Standards and Recommended Practice in accordance with ICAO SARPs, with requirements for the European Union, EASA and the European Organization for Safety of Air Navigation – EUROCONTROL – with the objective of continued improvement of safety and security.

BHDCA continuously enhances quality, effectiveness and efficiency of its performance with the view to meet the requirements of all stakeholders and to protect public interests.

Bosnia and Herzegovina Air Navigation Services Agency (BHANSA) is certified by BHDCA and responsible for the provision of air navigation services in the FIR Sarajevo or in the Area of Responsibility defined by international agreements with neighbouring states.

Main airport covered by LSSIP: Sarajevo Airport

---

<sup>1</sup> Bosnia and Herzegovina is also one of EASA's Pan-European Partners (PANEP). This is a community of non-EASA European countries with which EASA cooperates on the implementation of the EU aviation safety rules - either in the framework of comprehensive aviation agreements already concluded with the EU or in anticipation of such agreements.

## Traffic and Capacity

Summer Forecast (May to October inclusive)

The average en-route delay remained at zero minutes per flight in Summer 2019.

Bosnia and Herzegovina is part of:

The FAB CE – FAB Central Europe

## Progress per SESAR Phase

The figure below shows the progress made so far in the implementation of the SESAR baseline (Pre-SESAR and SESAR1 non-PCP) and the PCP elements.

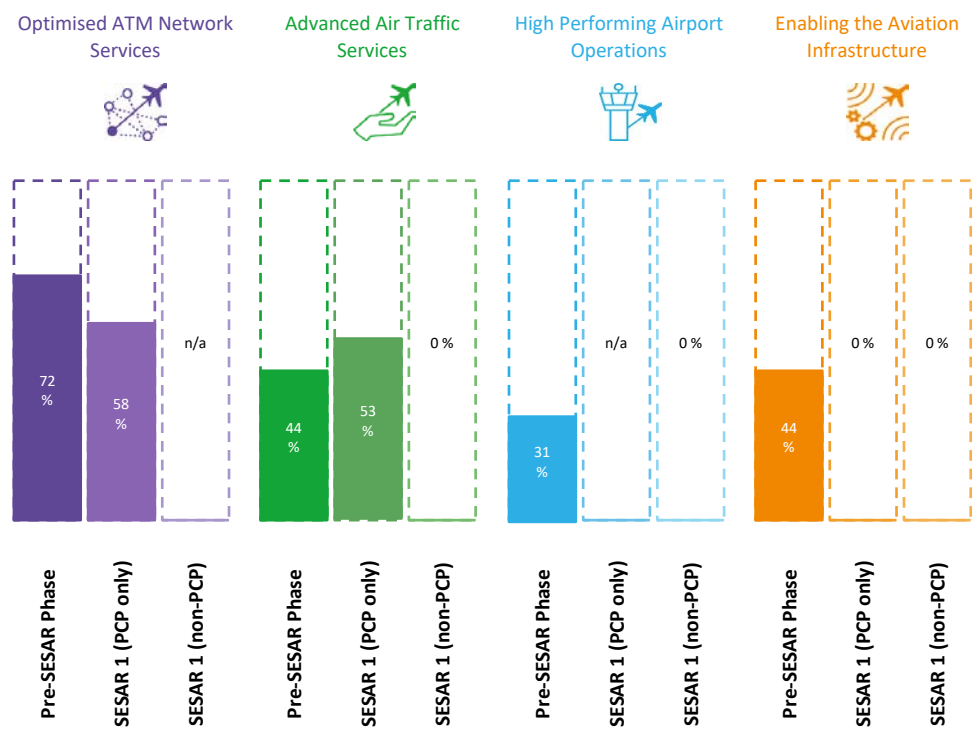

It shows the average implementation progress for all objectives grouped by SESAR Phases, excluding those for which the State is outside the applicability area as defined on a yearly basis in the European ATM Master Plan (Level 3) 2019, i.e. disregarding the declared “NOT APPLICABLE”. LSSIP progress status.

SESAR 1 (non-PCP) progress in the graphics below for this State is based on the following objectives: AOP15, ATC02.9, NAV12 and COM11.2.

## Progress per SESAR Key Feature and Phase

The figure below shows the progress made so far, per SESAR Key Feature, in the implementation of the SESAR baseline and the PCP elements. The percentages are calculated as an average, per Key Feature, of the same objectives as in the previous paragraph.

## ICAO ASBUs Progress Implementation

The figure below shows the progress made so far in the implementation of the ICAO ASBUs Block 0. The overall percentage is calculated as an average of the relevant Objectives contributing to each of the relevant ASBUs; this is a summary of the table explained in Chapter 5.3 – ICAO ASBU Implementation Progress.

## ATM Deployment Outlook

# Introduction

The Local Single Sky IMplementation (LSSIP) documents, as an integral part of the Master Plan (MP) Level 3 (L3)/LSSIP mechanism, constitute a short/medium term implementation plan containing ECAC States' actions to achieve the Implementation Objectives as set out by the MP Level 3 and to improve the performance of their national ATM System. This LSSIP document describes the situation in the State at the end of December 2019, together with plans for the next years.

**Chapter 1** provides an overview of the ATM institutional arrangements within the State, the membership of the State in various international organisations, the organisational structure of the main ATM players - civil and military - and their responsibilities under the national legislation. In addition, it gives an overview of the Airspace Organisation and Classification, ATC Units and the ATM systems operated by the main ANSP;

**Chapter 2** provides a comprehensive picture of the situation of Air Traffic, Capacity and ATFM Delay per each ACC in the State. It shows the evolution of Air Traffic and Delay in the last five years and the forecast for the next five years. It also presents the achieved performance in terms of delay during the summer season period and the planned projects assumed to offer the required capacity which will match the foreseen traffic increase and keep the delay at the agreed performance level;

**Chapter 3** provides the main Implementation Projects (at national, FAB and multinational level) which contribute directly to the implementation of the MP Operational Improvements and/or Enablers and Implementation Objectives. The Level 1 document covers a high-level list of the projects showing the applicable links. All other details like description, timescale, progress made and expected contribution to the ATM Key Performance Areas provided by the State per each project are available in the Level 2 document;

**Chapter 4** deals with other cooperation activities beyond Implementation Projects. It provides an overview of the FAB cooperation, as well as all other multinational initiatives, which are out of the FAB scope. The content of this chapter generally is developed and agreed in close cooperation between the States concerned;

**Chapter 5** contains aggregated information at State level covering the overall level of implementation, implementation per SESAR Key Feature and implementation of ICAO ASBUs. In addition, it provides the high-level information on progress and plans of each Implementation Objective. The information for each Implementation Objective is presented in boxes giving a summary of the progress and plans of implementation for each Stakeholder. The conventions used are presented at the beginning of the section.

*The Level 1 document is completed with a separate document called LSSIP Level 2. This document consists of a set of tables organised in line with the list of Implementation Objectives. Each table contains all the actions planned by the four national stakeholders (REG, ASP, MIL and APO) to achieve their respective Stakeholder Lines of Action (SLoAs) as established in the European ATM Master Plan L3 Implementation Plan Edition 2019. In addition, it covers a detailed description of the Implementation Projects for the State as extracted from the LSSIP Data Base.*

*The information contained in Chapter 5 – Implementation Objectives Progress is deemed sufficient to satisfy State reporting requirements towards ICAO in relation to ASBU (Aviation System Block Upgrades) monitoring.*

# 1. National ATM Environment

## 1.1. Geographical Scope

### International Membership

Bosnia and Herzegovina is a Member of the following international organisations in the field of ATM:

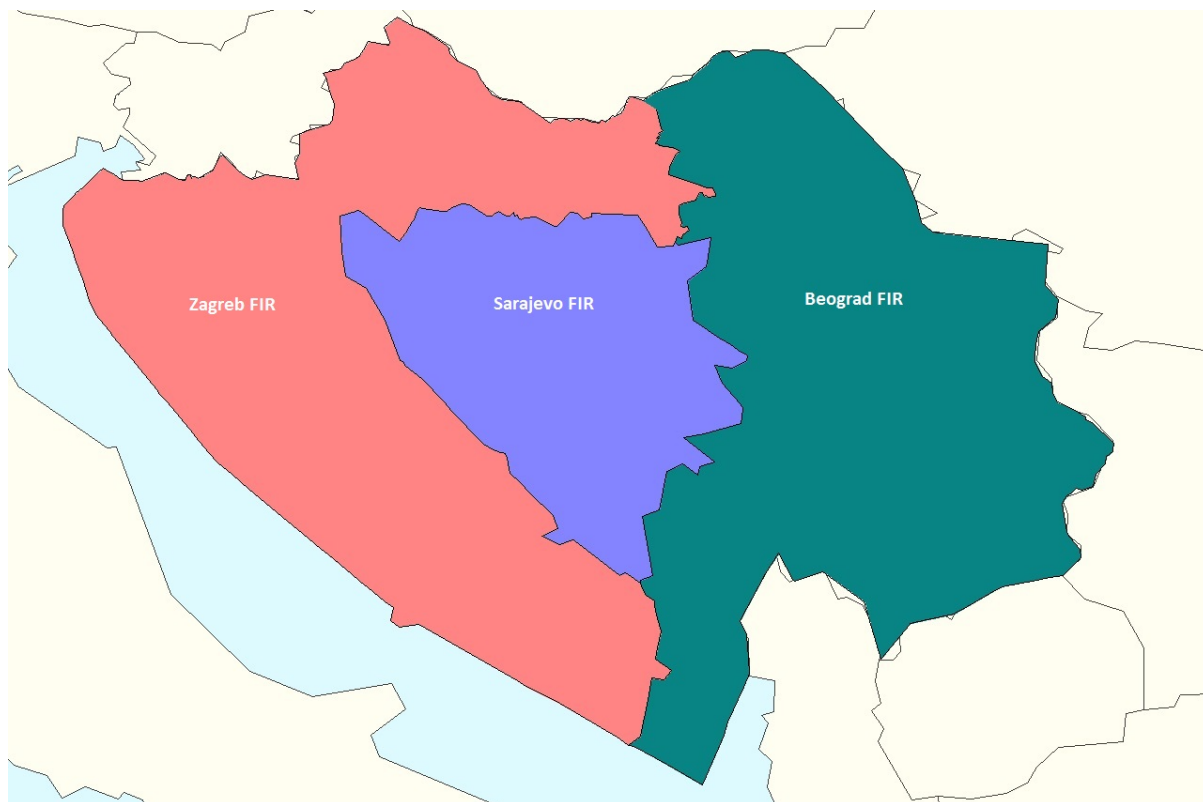

Organisation		Since
ECAC	✓	2001
EUROCONTROL	✓	2004
European Union	-	-
EASA	-	-
ICAO	✓	1993
NATO	-	-
ITU	-	-
JAA	✓	2008
EDA	-	-

### Geographical description of the FIR(s)

The geographical scope of this document addresses the Sarajevo FIR.

Sarajevo FIR is surrounded by FIRs of three States, namely Croatia, Montenegro, and Serbia.

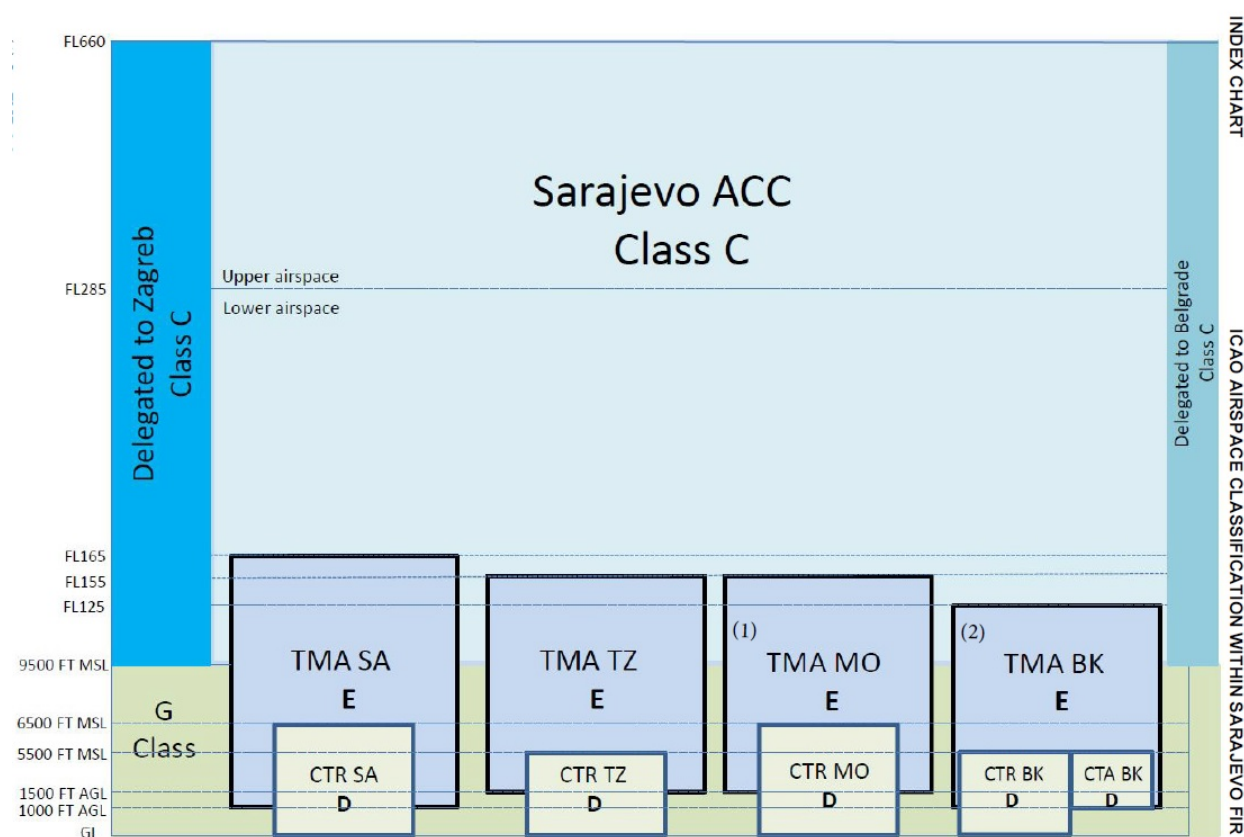

Current en-route BHANSA AoR:

## Airspace Classification and Organisation

Bosnia and Herzegovina is following the ICAO airspace classification. The figure below shows the current classification within Sarajevo FIR.

## ATC Units

The ATC units in the Bosnia and Herzegovina airspace, which are of concern to this LSSIP, are the following:

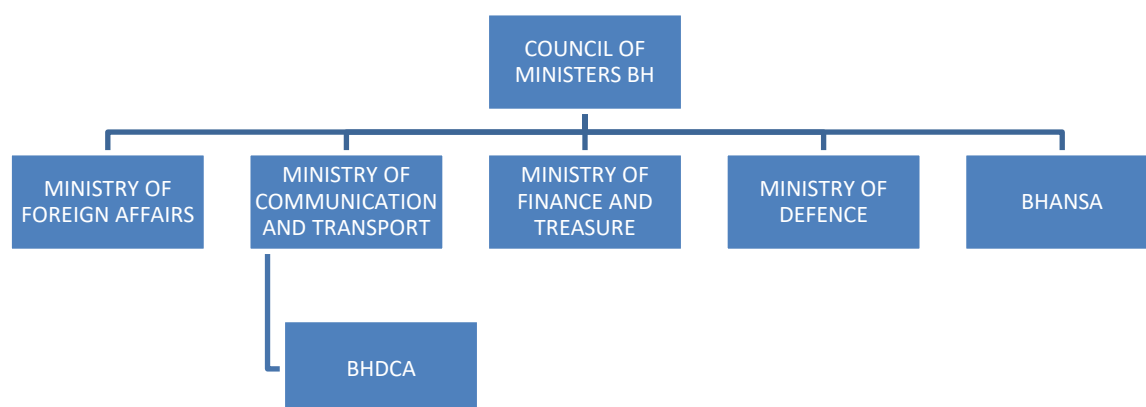

ATC Unit	Number of sectors		Associated FIR(s)	Remarks
	En-route	TMA		
BHACC	4	-	Sarajevo FIR	BHACC is comprised of 2 units, ATCU I Sarajevo and ATCU II Banja Luka
Banja Luka		1	Sarajevo FIR	Aerodrome and APP
Mostar	-	1	Sarajevo FIR	Aerodrome and APP
Sarajevo	-	2	Sarajevo FIR	Aerodrome and APP
Tuzla	-	1	Sarajevo FIR	Aerodrome and APP

## 1.2. National Stakeholders

The main National Stakeholders involved in ATM in Bosnia and Herzegovina are the following:

- The Ministry of Defence of Bosnia and Herzegovina;
- The Ministry of Communications and Transport of Bosnia and Herzegovina;
- BHDCA, Bosnia and Herzegovina Directorate of Civil Aviation (the role of NSA);
- BHANSA, Bosnia and Herzegovina Air Navigation Services Agency;
- The Ministry of Transport and Communications of the Republic of Srpska;
- The Ministry of Transport and Communications of the Federation of Bosnia and Herzegovina;

Their activities are detailed in the following subchapters and their relationships are shown in the diagram below.

## Civil Regulator(s)

### General Information

Under the present Aviation Law ("Official Gazette of BH" No 39/09), the Civil Aviation policy is under the authority of the Ministry of Communications and Transport of Bosnia and Herzegovina.

The Bosnia and Herzegovina Directorate of Civil Aviation (BHDCA) performs duties defined in the Aviation Law, and has the authority and responsibility for the execution of the Regulatory function and for oversight in civil aviation and air traffic control.

The BHDCA may delegate the provision of certification of the Service Provider to another institution duly authorized in accordance with international regulations.

Air Navigation Services in the airspace over the territory of Bosnia and Herzegovina shall be provided by the Air Navigation Services Agency - BHANSA. The foundation, responsibilities, authorities and management, as well as other issues essential to the establishment of the BHANSA are regulated under the Law on Air Navigation Services Agency of Bosnia and Herzegovina.

Air navigation services providers from other countries may continue to provide ANS within the airspace of Bosnia and Herzegovina if so regulated under an international agreement in which one of the contracting parties is Bosnia and Herzegovina.

The area of responsibility for provision of Air Navigation Services covers the TMAs, CTRs and the en-route airspace up to FL 660.

The different national entities having their own responsibilities in ATM are summarised in the table below. The BHDCA is further detailed in the following section:

Activity in ATM:	Organisation responsible	Legal Basis
Rule-making	BHDCA	The Aviation Law (Official Gazette of Bosnia and Herzegovina" No 39/09), bylaws and transposed EU Regulation.
Safety Oversight	BHDCA (audit and inspections)	The Aviation Law (Official Gazette of Bosnia and Herzegovina" No 39/09); Regulation on requirements for issuing certificate for providing air navigation services (Official Gazette of Bosnia and Herzegovina" No 54/17); Regulation on oversight in civil aviation (Official Gazette of Bosnia and Herzegovina" No 22/16, 55/18 and 5/19) and other relevant European regulations transposed.
Enforcement actions in case of non-compliance with safety regulatory requirements	BHDCA	The Aviation Law (Official Gazette of Bosnia and Herzegovina" No 39/09); Regulation on requirements for issuing certificate for providing air navigation services (Official Gazette of Bosnia and Herzegovina" No 54/17); Regulation on oversight in civil aviation (Official Gazette of Bosnia and Herzegovina" No 22/16 ,55/18 and 5/19).
Airspace	BHDCA Aviation Committee for airspace management in Bosnia and Herzegovina AMC (CIVAA, MILAA)	The Aviation Law (Official Gazette of Bosnia and Herzegovina" No 39/09); Regulation on transposition EU regulations on flexible use of airspace (Official Gazette of Bosnia and Herzegovina" No 79/10); Regulation of establishment and organisation of Airspace Management Cell (Official Gazette of Bosnia and Herzegovina" No 9/17); Decision on establishing Aviation Committee for airspace management in Bosnia and Herzegovina (Official Gazette of Bosnia and Herzegovina" No 75/16).
Economic	BHDCA	The Aviation Law (Official Gazette of Bosnia and Herzegovina" No 39/09); Regulation in the determining of a common scheme for air navigation services (Official

Activity in ATM:	Organisation responsible	Legal Basis
		Gazette of Bosnia and Herzegovina" No 79/10); Regulation on the method of determining and financing the cost of providing air navigation services in the airspace of Bosnia and Herzegovina (Official Gazette of Bosnia and Herzegovina" No 86/11).
Environment	BHDCA	The Aviation Law (Official Gazette of Bosnia and Herzegovina" No 39/09).
Security	BHDCA	The Aviation Law (Official Gazette of Bosnia and Herzegovina" No 39/09).
Accident investigation	Ministry of Communication and Transport	The Aviation Law (Official Gazette of Bosnia and Herzegovina" No 39/09); Regulation on Investigation of Aircraft Accidents and Serious Incidents (Official Gazette of Bosnia and Herzegovina" No 30/14).

## BHDCA

The BHDCA (Bosnia and Herzegovina Directorate of Civil Aviation) is an administrative organization within the Ministry of Communications and Transport of Bosnia and Herzegovina. The seat of the BHDCA is in Banja Luka. The BHDCA has regional offices situated in Sarajevo and Mostar.

BHDCA has continued the legal continuity of the Bosnia and Herzegovina Directorate of Civil Aviation established by the Aviation Law of Bosnia and Herzegovina (BiH Official Gazette No: 02/04).

The BHDCA is the only civil aviation authority responsible for aircraft registration and issuance, extension and renewal of licences, certificates, endorsements and authorisations in the civil aviation of Bosnia and Herzegovina.

BHDCA performs inspections and controls via authorized inspectors. Inspections and controls may be performed inter alia on aircraft, aerodromes and airfields, air traffic control facilities and air operator certificate holders, aviation and other professional personnel.

The BHDCA, as a designated body of the National Supervisory Authority (NSA) for civil aviation, shall certificate the Service Provider and supervise the provision of air navigation services by the service provider, for the purpose of maintaining safety.

Annual Report published:	Y	Annual report will be available on request. Annual Safety Oversight Report Year 2019 is under preparation, by end of March.
--------------------------	---	--

The web site of the BHDCA is: [www.bhdca.gov.ba](http://www.bhdca.gov.ba)

## Air Navigation Service Provider(s)

### BHANSА

#### Services provided

BHANSА (Bosnia and Herzegovina Air Navigation Services Agency) is established by the Law as the Agency for Air Navigation Services in Bosnia and Herzegovina ("Official Gazette of BH" No 43/09). Under that Law BHANSА is responsible for: the provision of air traffic control services, provision of communication, navigation and surveillance services, provision of aeronautical information services, provision of aeronautical meteorological services, operations of the rescue coordination center in search and rescue, education and training of air traffic control staff, export and import for the needs of the Agency, other tasks and operations providing for safe air navigation.

The Agency shall provide air navigation services in the airspace of Bosnia and Herzegovina for the Flight Information Region (FIR Sarajevo).

The Agency may also provide air navigation services outside of the airspace of Bosnia and Herzegovina and it should be regulated by an international agreement with Bosnia and Herzegovina being a contracting party therein.

BHANSА shall comprise the organizational units as follows: Main office in Mostar; Area Control Centre (ACC) with operational Air Traffic Control Units in Sarajevo (ATCU I) and Banja Luka (ATCU II); Operational-technical services; Bosnia and Herzegovina Meteorological Watch Office (BiH MET) in Banja Luka, Flight information Service of Bosnia and Herzegovina (FIS) integrated with BHRCC in Banja Luka, Aeronautical Information Services of Bosnia and Herzegovina (AIS BiH) in Mostar; Air Traffic Control Training Centre with ATC simulator in Mostar, International NOTAM office of Bosnia and Herzegovina (BH NOF) in Sarajevo, Approach and Aerodrome Control Units at the controlled airports in Bosnia and Herzegovina: Sarajevo, Banja Luka, Mostar and Tuzla.

BHANSА in cooperation with MoD introduces Airspace Management Cell of Bosnia and Herzegovina – AMC.

Governance:	State Ministerial Organs		Ownership:	State

Upgrade of the ATC system is performed or planned?	
Replacement of the ATC system by the new one is planned?	
ATC Unit	APP Sarajevo

### SDPS

Specify the manufacturer of the ATC system currently in use:	ARTAS - Main
Upgrade of the ATC system is performed or planned?	Performed in 2019
Replacement of the ATC system by the new one is planned?	
ATC Unit	ACC/ APP Sarajevo

Specify the manufacturer of the ATC system currently in use:	Indra Mangair (DPS) - Backup
Upgrade of the ATC system is performed or planned?	Performed in 2019
Replacement of the ATC system by the new one is planned?	
ATC Unit	ACC/ APP Sarajevo

Specify the manufacturer of the ATC system currently in use:	Indra Mangair (DPS) - Fallback
Upgrade of the ATC system is performed or planned?	Performed in 2019
Replacement of the ATC system by the new one is planned?	
ATC Unit	ACC/ APP Sarajevo

Specify the manufacturer of the ATC system currently in use:	Thales Eurocat-C (DPS)
Upgrade of the ATC system is performed or planned?	
Replacement of the ATC system by the new one is planned?	
ATC Unit	APP Sarajevo

<sup>2</sup> Technology alliance is an alliance with another service provider for joint procurement of technology from a particular supplier (e.g. COOPANS alliance)

<sup>3</sup> Upgrade is defined as any modification that changes the operational characteristics of the system (SES Framework Regulation 549/2004, Article 2 (40))

## Airports

### General information

There are four airports in Bosnia and Herzegovina, namely Banja Luka/Mahovljani, Mostar/Ortiješ, Sarajevo/Butmir and Tuzla/Dubrave are operated by public enterprises that are responsible only for ground services.

### Airport(s) covered by the LSSIP

Referring to the List of Airports in the European ATM Master Plan Level 3 Implementation Plan Edition 2019 – Annex 2, it is up to the individual State to decide which additional airports will be reported through LSSIP for those Objectives.

Therefore, Sarajevo International Airport (LQSA) is the only airport in Bosnia and Herzegovina covered by the LSSIP Year 2019.

The EUROCONTROL Public Airport Corner also provides information for the following airport(s):

[https://ext.eurocontrol.int/airport\\_corner\\_public/LQSA](https://ext.eurocontrol.int/airport_corner_public/LQSA)

## Military Authorities

The organizations and bodies of defense structure of BiH as it shown on figure 6.2. have responsibilities as follow:

The Presidency of Bosnia and Herzegovina has supreme command and control over the Armed Forces of Bosnia and Herzegovina while Parliamentary Assembly of Bosnia and Herzegovina conducts civilian control over the Armed Forces of Bosnia and Herzegovina.

The Ministry of Defense of Bosnia and Herzegovina is in charge of the overall strategy and policy for the defense system of Bosnia and Herzegovina. Airspace Management and Protection Division as a part of Sector for policy and plans is doing tasks related to Military Aviation Authority on behalf of Ministry of Defense.

The Joint Staff of the AF BiH is responsible for planning, organization and implementation of the directive and orders of the Minister of Defense of BiH.

The Operational Command of the AF BiH implements the policies of the Joint Staff of the AF BiH as well as tasks related to air force and air defense while Support Command manages personnel, logistics and training matters.

Air Force and Air Defense Brigade, which is consisted of 2 flying squadrons, 1 fix wing sq. air surveillance battalion, air defense battalion, and flight support battalion, is subordinated to Operational Command.

Division responsible for the using of airspace, airspace defense, organization, definition of military operational requirements is an integral part of Policy and Planning Sector and does not have any particular role in the provision of ATS.

## User role

IFR inside controlled airspace, Military aircraft can fly?	OAT only		GAT only		Both OAT and GAT	Y
--	----------	--	----------	--	------------------	---

If Military fly OAT-IFR inside controlled airspace, specify the available options:					
Free Routing	N	Within specific corridors only		Y	
Within the regular (GAT) national route network	N	Under radar control		Y	
Within a special OAT route system	N	Under radar advisory service		Y	

If Military fly GAT-IFR inside controlled airspace, specify existing special arrangements:									
No special arrangements					N	Exemption from Route Charges			Y
Exemption from flow and capacity (ATFCM) measures					N/A	Provision of ATC in UHF			N
CNS exemptions:	RVSM	N	8.33	N	Mode S	N	ACAS		N
Others:	-								

## Flexible Use of Airspace (FUA)

Military in Bosnia applies FUA requirements as specified in the Regulation No 2150/2005:	Y
FUA Level 1 implemented:	Y Airspace Management Committee of Bosnia and Herzegovina since 2016
FUA Level 2 implemented:	Y Airspace Management Cell – AMC since 6 December 2018
FUA Level 3 implemented:	Y

## 2. Traffic and Capacity

### 2.1. Evolution of traffic in Bosnia and Herzegovina

EUROCONTROL Seven-Year Forecast (Autumn 2019)											
IFR flights yearly growth		2016 A	2017 A	2018 A	2019 F	2020 F	2021 F	2022 F	2023 F	2024 F	2025 F
Bosnia-Herzegovina	H				11.7%	6.5%	5.1%	4.2%	3.9%	4.0%	3.5%
	B	2.6%	12.6%	8.3%	11.2%	4.5%	3.1%	3.1%	2.7%	2.9%	2.2%
	L				10.6%	2.4%	0.9%	1.4%	1.3%	1.4%	0.7%
ECAC	B	2.8%	4.0%	3.8%	1.1%	2.3%	1.9%	2.2%	1.8%	1.9%	1.4%

#### 2019

Based on NM archived data, traffic in BHANSA area of in responsibility increased by 52.4% 2019 compared to 2018.

#### 2020-2024

The EUROCONTROL Seven-Year Forecast predicts an average annual increase between 1.3% and 4.5% throughout the planning cycle, with a baseline growth of 3.1%.

## 2.2. ACC BH

### Traffic and en-route ATFM delays 2015-2024

### Performance summer 2019

BHACC	Traffic evolution (2019 vs 2018)			En-route Delay (min. per flight)		Capacity (2019 vs 2018)		
	Traffic Forecast		Actual Traffic	All reasons	ACC Reference Value	Planned	Achieved	Capacity gap?
	Current Routes	Shortest Routes						
Year	H: 3.1%		+52.1%	0.00	0.01			
Summer	B: 2.5% L: 1.0%	+25%	+12.4%	0.00		27 (+0%)	27 (+0%)	No
<b>Summer 2019 performance assessment</b>								
The average en-route delay per remained at zero minutes per flight in Summer 2019. The capacity baseline was estimated with ACCESS at 27. During the measured period, the average peak 1 hour demand was 15 and the average peak 3 hour demand was 13.								
Operational actions				Achieved	Comments			
Implementation of 2 PBN procedures for TMA Mostar and Banja Luka				No	Postponed to 2020.			
Enhanced ATFM techniques, including STAM				Yes				
Changes of areas of responsibility between Zagreb, Beograd and BH ACCs (Phase 2 BHANSA). New ATCC sectorisation				Yes	Cut-off date 5.12.2019.			
New procedures shall be developed after FRA RTS and System upgrade				Yes				
NEW ATCOs				Yes				
New VCS implementation - DPS Upgrade				Yes				

CAPAN study	Yes	
New and flexible sectorisation and sector capacities	Yes	Cut-off date 5.12.2019.
Maximum configuration: 2 sectors	Yes	<ul style="list-style-type: none"> <li>- 2 sectors were opened,</li> <li>- 4 sectors will be opened after Cut-off date 05.12.2019.</li> </ul>

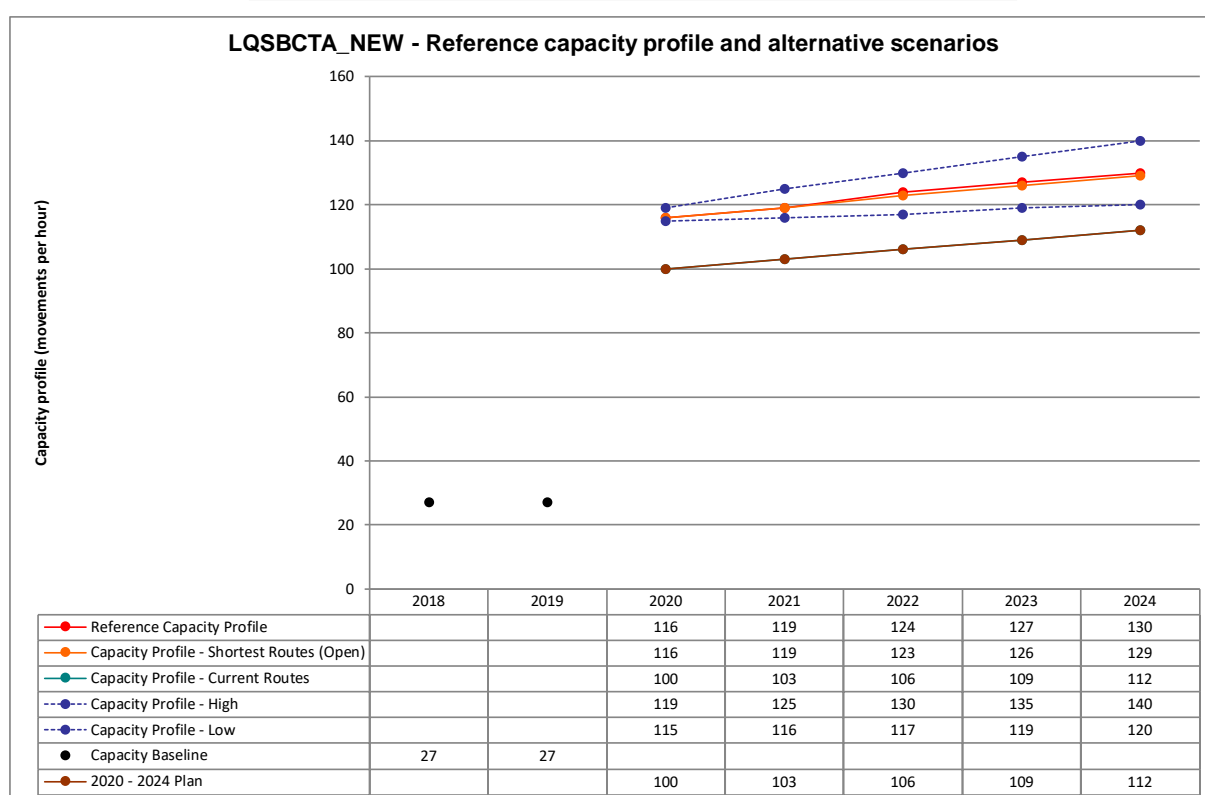

## Planning Period 2020-2024

The planning focuses on the Summer season to reflect the most demanding period of the year from a capacity perspective. This approach ensures consistency with the previous planning cycles.

The measures for each year are the measures that will be implemented before the summer season.

Summer Capacity Plan					
	2020	2021	2022	2023	2024
Free Route Airspace					
Airspace Management Advanced FUA	LARA				
Airport & TMA Network Integration	Implementatio n of 2 PBN procedures for TMA Mostar and Banja Luka				
Cooperative Traffic Management	Enhanced ATFM techniques, including STAM				
Airspace	TMA Sarajevo, Tuzla, Banja Luka, Mostar reorganisation				
Procedures					
Staffing	NEW ATCOs				
Technical	Continuous system upgrades				
Capacity	Continous capacity assessment				
Significant Events	BHATM Phase 2				
Max sectors	4	5	5	5	5
Planned Annual Capacity Increase	270%	3%	3%	3%	3%
Reference profile Annual % Increase	330%	3%	4%	2%	2%
Current Routes Profile % Increase	270%	3%	3%	3%	3%
Difference Capacity Plan v. Reference Profile	-13.8%	-13.4%	-14.5%	-14.2%	-13.8%
Difference Capacity Plan v. Current Routes Profile	0.0%	0.0%	0.0%	0.0%	0.0%
Annual Reference Value (min)	0.17	0.18	0.14	0.10	0.10
Additional information					

#### 2020-2024 Planning Period Outlook

No capacity problems are foreseen for the ACC during the planning cycle if flights would follow the current routes. Should the traffic shift onto the shortest routes additional capacity enhancement measures would be required.

## 3. Implementation Projects

The tables below presents the high-level information about the main projects currently ongoing in Bosnia and Herzegovina. The details of each project are available in Chapter 2 of the Level 2 - Detailed Implementation Status document.

### 3.1. National projects

Name of project:	Organisation(s):	Schedule:	Status:	Links:
New AMHS	BHANSa (BA)	2Q 2020	Ongoing	L3: COM10
New MET	BHANSa (BA)	mid 2021	procurement in progress	-
New Military Radio stations	Mil. Authority (BA)	mid 2019	procurement in progress	L3: ITY-AGVCS2
New Radio Stations (APP)	BHANSa (BA)	1Q 2021	procurement in progress	L3: COM11.1, ITY-AGVCS2
New VCS (APP)	BHANSa (BA)	1Q 2021	Procurement in progress	L3: COM11.1

### 3.2. FAB projects

Name of project:	Organisation(s):	Schedule:	Status:	Links:
Airspace Task Force	ASP ANS CR (CZ), Austrocontrol (AT), BHANSA (BA), CCL Service Provider (HR), HungaroControl (HU), Letové prevádzkové služby Slovenskej republiky, štátny podnik (SK), Slovenia Control (SI)	Start: 10.04.2019, End: 30.05.2020	Activities are ongoing	L3: AOM21.2
DEVOPS: FABCE Development of Operational Performance and ATM Strategies (previously Project 1) (DEVOPS)	ASP ANS CR (CZ), Austrocontrol (AT), BHANSA (BA), CCL Service Provider (HR), HungaroControl (HU), Letové prevádzkové služby Slovenskej republiky, štátny podnik (SK), Slovenia Control (SI)	Start 3.1.2011, End: Continuous	FAB CE FRA Study was completed in 2017. Other activities above are ongoing.	L3: AOM21.2 DP: N/A but included in DP under '102AF3 Free route airspace from the Black Forest to the Black Sea' RP2 PP: FAB CE FRA Project (described under NSP actions 'FAB CE Airspace and route structure planning' and 'Free Route Airspace')
FAB CE Contingency Readiness - Phase II	ASP ANS CR (CZ), Austrocontrol (AT), BHANSA (BA), CCL Service Provider (HR), HungaroControl (HU), Letové prevádzkové služby Slovenskej republiky, štátny podnik (SK), Slovenia Control (SI)	Start: 01.01.2019, End: 31.12.2020	Activities are ongoing	-
Navigation infrastructure optimization project	ASP ANS CR (CZ), Austrocontrol (AT), BHANSA (BA), CCL Service Provider (HR), HungaroControl (HU), Letové prevádzkové služby Slovenskej republiky, štátny podnik (SK), Slovenia Control (SI)	Start: April 2018, End: February 2020	On-going	-

### 3.3. Multinational projects

Name of project:	Organisation(s):	Schedule:	Status:	Links:
Innovative transportation services for blind and visually impaired passengers in Danube Region	SARAJEVO Airport (BA)	Ongoing	-	-
eGAFOR (2016-EU-TMC-0075-S)	BHANSA (BA), CCL Service Provider (HR), ROMATSA (RO), SMATSA (BA)	The project is expected to be completed by December 31, 2020.	Ongoing	-

## 4. Cooperation activities

### 4.1. FAB Co-ordination

Having signed and ratified the Agreement on the Establishment of Functional Airspace Block Central Europe, Austria, Bosnia and Herzegovina, Croatia, the Czech Republic, Hungary, Slovakia and Slovenia are part of FAB CE.

The FAB CE States agreed on establishment of the following permanent bodies - the FAB CE Council, NSA Coordination Committee and Joint Civil-Military Airspace Coordination Committee. The FAB CE Council can also establish other bodies necessary for the implementation, operation and further development of the FAB CE Programme. At the ANSP level, the FAB CE is directed and steered by the CEO Committee and Steering Committee. Specialised SubCommittees have been established for operational, technical, safety, financial, HR and legal domains.

The air navigation service providers of the FAB CE countries established a joint company **FABCE Aviation Services, Ltd** (FCE) already in 2014 and the company is responsible for the professional management of various regional air navigation projects. The establishment of this joint venture is not only effectively aiming at the progress of the FAB CE programme, but at the same time the Single European Sky programme of the European Union. In 2018, the ANSPs decided to modify the FCE Memorandum of Association and Shareholders Agreement which now allows technical and operational projects to be launched by a group of FAB CE partners focused on a specific area of air traffic management performance improvement. Not all FAB CE ANSPs share the same operational, traffic load and equipment priorities, but until now there was a need for the consent of all partners to proceed. This agreement allows FAB CE partners with a focus on a specific area of performance improvement to form new collaborative agreements which helps to address specific customer requirements while increasing the overall effectiveness of the FAB CE work programme.

There have been a number of important achievements in 2019 focusing on several key areas. The following bullets summarise the most important activities delivering the benefits to airspace users:

- Airspace planning and network development activities focusing on continuous improvements to enable optimum use of airspace, taking into account air traffic flows are the top priority for FAB CE. The FAB CE ANSPs have transformed themselves into a 'FAB CE Airspace Alliance' in 2018 and dedicated a lot of effort to initiate actions to be taken by FAB CE ANSPs in support of the Network Manager's (NM) European Airspace Architecture Study (EAAS) airspace re-configuration programme Transition Plan. The ANSPs agreed a number of important airspace design improvement studies and related technical programmes to ensure airspace users can further optimise their trajectories through FAB CE airspace over the coming years. This triggered also a complete revision of the FAB CE Strategy for 2020-2030 to be fully aligned with the EAAS vision which has been mostly completed in 2019 and is now pending approval. More detailed actions how to achieve the vision are now being elaborated in the new FAB CE High Level Plan.
- FAB CE has established a Task Force to study further areas of regional cooperation with the aim of establishing an airspace design optimized for all airspace users aligned with the EAAS activities. FAB CE is fully prepared to cooperate with the Network Manager, supporting the planning and implementation of proposed concepts in a network centric approach and the implementation of Digital European Sky functionality, which was confirmed at the joint meetings with NM under the umbrella of this activity. FAB CE invited the NM to participate directly in the FAB CE Airspace Task Force activities and started to gather all requirements and views on NM roadmap proposals for a major re-sectorisation of FAB CE airspace.
- The FAB CE states, together with their neighbouring partners, are still at the frontline of the Free Route Airspace (FRA) implementation in the region. The NM confirmed that FAB CE is the most advanced FAB in terms of FRA deployment and very few elements are missing from the complete deployment of FRA procedures in the FAB CE area. Further organic expansion of FRA through the Introduction of the new sectorisation programme will need to be performed gradually. The completion of the SEE FRA project (South East Europe Free Route Airspace) on November 7, 2019 has opened up 24/7 cross border free route operations across the airspace of Bulgaria, Hungary and Romania. As a future step, Slovakia (as a part of SEEN FRA project - South East Europe Night Free Route Airspace together with Bulgaria, Hungary and Romania), will assess the opportunities to join the SEE FRA airspace as 24/7 free route operations are

already implemented within Slovakian airspace. To enable the full benefits of FRA implementation the FAB CE ANSPs agreed to start work on the implementation plan for the merger of the current SEE(N) FRA and SECSI FRA areas to enable FAB CE-wide seamless and traffic flow-oriented FRA area. Full FRA coverage in FAB CE will be achieved following the implementation in 2021 by ANS Czech Republic of FRA in the Prague flight information region (FIR).

- FAB CE ANSPs have completed Phase I of an activity to develop a joint contingency concept in cooperation with the Network Manager in 2018. Phase I resulted in commonly agreed concept, procedures and technical enablers for the management of short- and medium-term (less than 2 hours) contingency event. FAB CE has now initiated Phase II which will address management of long-term contingency events (beyond 2 hours duration) and will provide for a common coordination platform for coordinating and monitoring the implementation activities of Phase I. Due to the delays in NM coordination the project mobilisation has been however delayed and activities are planned to take place during 2020.
- The NAVAID optimisation project (which will improve interoperability and data-sharing through the optimisation of navigational aid infrastructure, reducing duplication and unnecessary complexity) significantly progressed in 2019. The processes for coordinated NAVAID infrastructure and preventive maintenance planning and information-sharing where operational dependencies are evident have been developed and are in the process of implementation. The second part of the project is focusing on an analysis of NAVAID infrastructure and coverage - including those of neighbouring countries, is ongoing and is expected to be completed in the first quarter of 2020. The objective is to identify potential areas for improvement, including operational interdependencies and requirements. The third part, which is now completed, focused on solving operational issues – namely, assessing vulnerabilities within the global navigation satellite system (GNSS) network. This will require addressing signal monitoring and interference issues while assessing how free route airspace will influence the requirements for ground-based NAVAIDs in this new era of area navigation operations.
- FAB CE ANSPs finalised their common approach to meeting the requirements for Air Traffic Safety Electronics Personnel (ATSEP) training required by European Commission Regulation 2017/373, the “Air Traffic Management Common Requirements Implementing Regulation” (ATM IR), which comes into effect on 2 January 2020. It has required a considerable level of cooperation among FAB CE partners to develop a common approach to certifying ATSEP competency levels as each ANSP has deployed different technologies, and has different support and training requirements.
- In 2019, FAB CE has identified and initiated a number of cooperation activities in the technical domain. These include a coordinated approach to ADS-B deployment, coordinated monitoring and protection of surveillance frequencies, common approach to datalink monitoring. Several ANSPs participate in the smart procurement of spare parts procurement and equipment suppliers have been contacted to investigate procurement pooling arrangements. The processes established under the previous project on surveillance infrastructure and services optimisation are ongoing. A group of the ANSPs are working on coordinated testing to enable sharing of the experience between ANSPs and allow more efficient planning of VoIP. Other cooperation activities include the assessment of the future FAB CE communication network called X-bone, joint RCOM and NAV workshops and coordination of the cyber security activities.

The FAB CE Programme is continuously updated by the FAB CE bodies under management of the FAB CE Programme Manager with the support of the FAB CE Programme Support Office and there are a number of pending projects focusing on delivering additional benefits to airspace users that will be implemented in the near future.

## 5. Implementation Objectives Progress

### 5.1. State View: Overall Objective Implementation Progress

The graph below shows progress for all Implementation Objectives (applicable and not applicable to the State).

## 5.2. Objective Progress per SESAR Key Feature

The Implementation objectives progress charts per Key Feature below show progress only for Implementation Objectives applicable to the State and which are not local objectives.

Note: The detailed table of links between Implementation Objectives and SESAR Key Features is available in Annex C: Implementation Objectives' links with SESAR, ICAO and DP.

Legend:

▲ ## % = Expected completion / % Progress

▲ 100% = Objective completed

 = Implementation Objective timeline (different colour per KF)

 = Completion beyond Implementation Objective timeline

### Optimised ATM Network Services

## High Performing Airport Operations

## Enabling Aviation Infrastructure

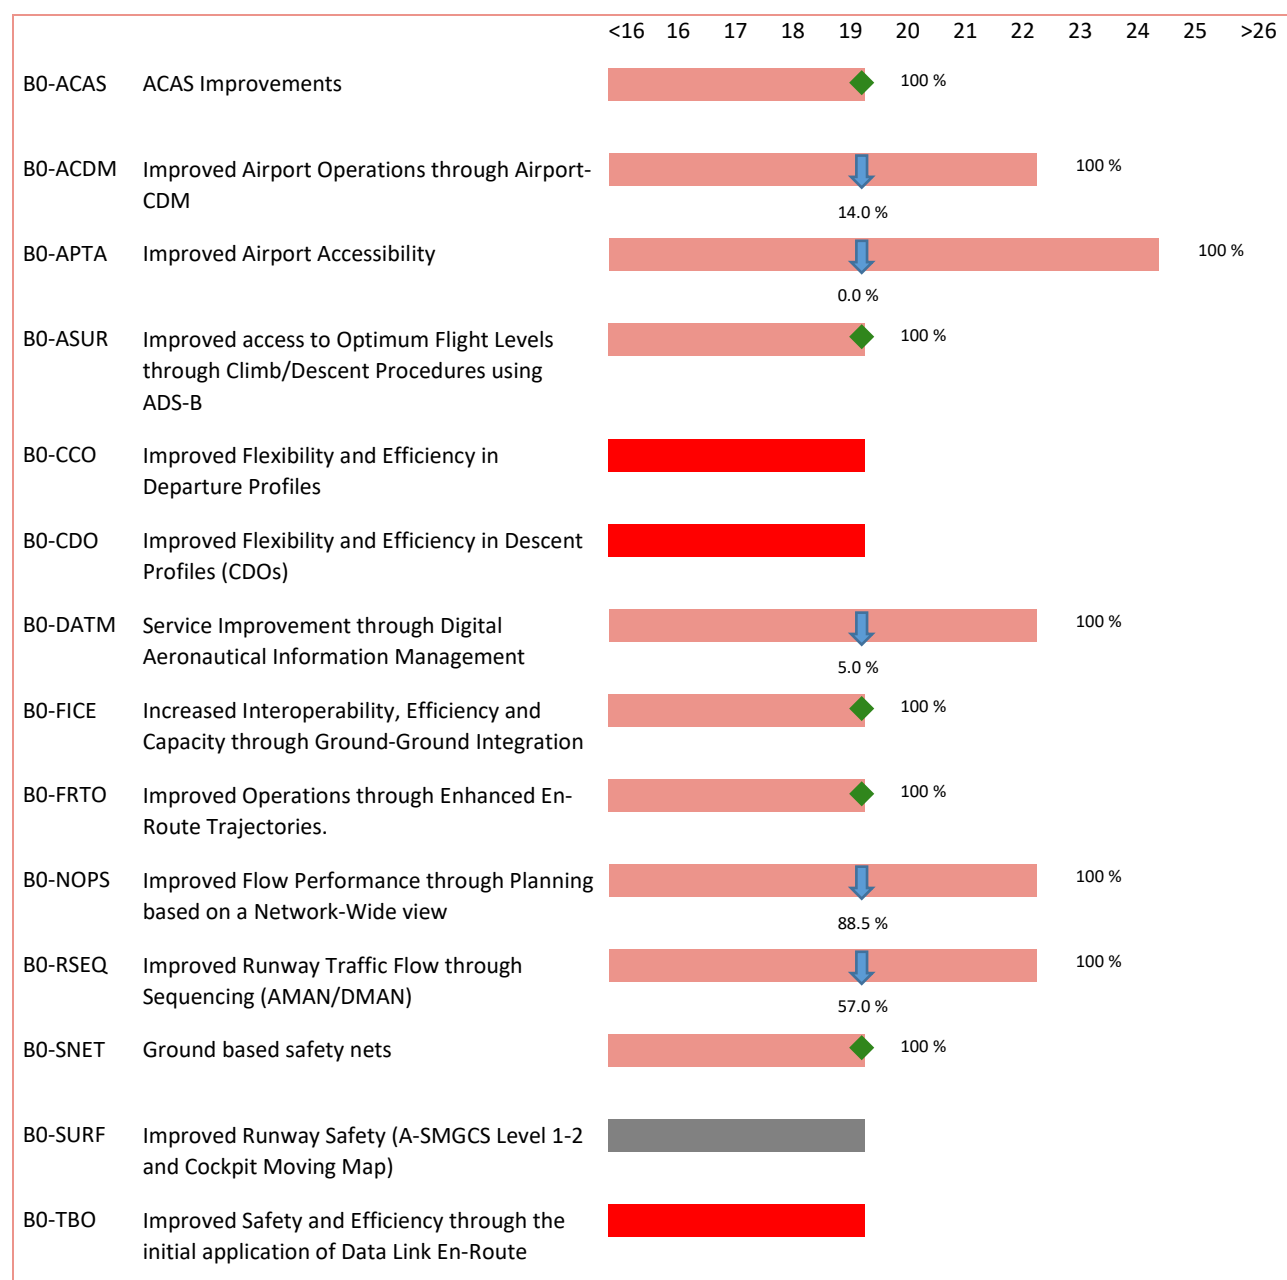

### 5.3. ICAO ASBU Implementation Progress

The following table shows, for each of the ASBU Block 0 modules, the overall status, the final date foreseen for completion and the percentage of progress achieved in the current cycle.

These results were determined using the LSSIP Year 2019 declared statuses and progress of the relevant Implementation objectives in accordance with the mapping approved by the ICAO EUR EASPG/1 meeting (European Aviation System Planning Group).

Legend:

## 5.4.Detailed Objectives Implementation progress

FCM05 - Interactive rolling NOP		NOP	#20, #21	4.2.2 4.2.4	B1-ACDM B1-NOPS	-	AM-1.12
FCM06 - Traffic Complexity Assessment		ATFCM	#19	4.4.2	B1-NOPS	-	AM-1.13
FCM07 - Calculated Take-off Time (CTOT) to Target Times for ATFCM Purposes		ATFCM	#18	4.3.1 4.3.2	B1-NOPS	-	AM-1.9
FCM09 - Enhanced ATFM Slot swapping		ATFCM	#56	-	B1-NOPS	-	-

Level 3 Implementation Objectives	SESAR Key Feature	Major ATM change	SESAR Solution	DP family	ICAO ASBU B0, B1, B2	EPAS	AAS TP
*AOM21.1 - Direct Routing		Free Route	#32	3.2.1 3.2.3	B0-FRTO B1-FRTO	-	-
AOM21.2 - Free Route Airspace		Free route	#33, #66	3.2.1 3.2.4	B1-FRTO	-	AM-1.6 AM-1.10 AM-5.1
ATC02.8 - Ground based safety nets		ATM Systems	-	3.2.1	B0-SNET B1-SNET	-	-
ATC02.9 – Enhanced STCA for TMAs		ATM Systems	#60	-	B0-SNET B1-SNET	MST.030	-
ATC07.1 - Arrival management tools		Enhanced Arrival Seq	-	1.1.1	B0-RSEQ	-	-
ATC12.1 - MONA, TCT and MTC		ATM Systems	#27, #104	3.2.1	B1-FRTO	-	AM-1.15 AM-5.1
ATC15.1 – Initial extension of AMAN to En-route		Enhanced Arrival Seq	-	1.1.2	B1-RSEQ	-	-
ATC15.2 - Extension of AMAN to En-route		Enhanced Arrival Seq	#05	1.1.2	B1-RSEQ	-	AM-1.3
ATC17 - Electronic Dialog supporting COTR		Free Route	-	3.2.1	-	-	AM-1.3
ATC18 – Multi Sector Planning En-route – 1P2T		Free Route	#63	-	-	-	AM-4.3 AM-5.1
ATC19 - Enhanced AMAN-DMAN integration		Enhanced Arrival Seq	#54	-	B2-RSEQ	-	-
ATC20- Enhanced STCA with down-linked parameters via Mode S EHS		ATM Systems	#69	-	B1-SNET	-	-
ENV01 – Continuous Descent Operations		PBN	-	-	B0-CDO B1-CDO	-	-
ENV03 – Continuous Climb Operations		PBN	-	-	B0-CCO	-	-
NAV03.1 – RNAV1 in TMA Operations		PBN	#62	-	B0-CDO B0-CCO B1-RSEQ	RMT.0639 RMT.0445	-

Level 3 Implementation Objectives	SESAR Key Feature	Major ATM change	SESAR Solution	DP family	ICAO ASBU B0, B1, B2	EPAS	AAS TP
NAV03.2 – RNP1 in TMA Operations		PBN	#09, #51	1.2.3 1.2.4	B1-RSEQ	RMT.0639 RMT.0445	-
NAV10 - RNP Approach Procedures to instrument RWY		PBN	#103	1.2.1 1.2.2	B0-APTA	RMT.0639 RMT.0445R MT.0643	-
NAV12 – ATS IFR Routes for Rotorcraft Operations		PBN	#113	-	B1-APTA	MST.031	-
AOP04.1 - A-SMGCS Surveillance (former Level 1)		Surface mgt	#70	2.2.1	B0-SURF	-	-
AOP04.2 - A-SMGCS RMCA (former Level 2)		Surface mgt	-	2.2.1	B0-SURF	-	-
AOP05 - Airport CDM		Collaborative Apt	#106	2.1.1 2.1.3	B0-ACDM B0-RSEQ	-	-
AOP10 - Time Based Separation		Enhanced ops in vicinity of rwy	#64	2.3.1	B1-RSEQ B2-WAKE	-	-
AOP11 - Initial Airport Operations Plan		Collaborative Apt	#21	2.1.4	B1-ACDM	-	-
AOP12 - Improve RWY and Airfield safety with CATC detection and CMAC		Surface mgt	#02	2.1.2 2.5.1	B2-SURF	-	-
AOP13 – Automated assistance to Controller for Surface Movement planning and routing		Surface mgt	#22 #53	2.4.1	B1-ACDM B1-RSEQ B2-SURF	-	-
AOP14 – Remote Tower Services		Remote Tower	#12, #71, #52, #13	-	B1-RATS	RMT.0624	-
AOP15 - Enhanced traffic situational awareness and airport SNET for the vehicle drivers		Surface mgt	#04	-	B2-SURF	-	-
AOP16 - Guidance assistance through airfield ground lighting		Surface mgt	#47	-	B1-RSEQ B2-DURF	-	-
AOP17 - Provision/integration of departure planning information to NMOC		Collaborative Apt	#61	-	B1-ACDM B1-NOPS	-	-

Level 3 Implementation Objectives	SESAR Key Feature	Major ATM change	SESAR Solution	DP family	ICAO ASBU B0, B1, B2	EPAS	AAS TP
AOP18 - Runway Status Lights (RWSL)		Surface mgt	#01	-	B2-SURF	-	-
ENV02 – Airport Collaborative Environmental Management		Collaborative Apt	-	-	-	-	-
NAV11 - Implement precision approach using GBAS CAT II/III based on GPS L1		Enhanced ops in vicinity of rwy	#55	-	B1-APTA	-	-
SAF11 - Improve runway safety by preventing runway excursions		Surface mgt	-	-	-	MST.007 RMT.0570 RMT.0703	-
COM10 - Migration from AFTN to AMHS		CNS rat.	-	-	-	-	-
COM11.1 - Voice over Internet Protocol (VoIP) in En-Route		CNS rat.	-	3.1.4	-	-	AM-1.3
COM11.2 - Voice over Internet Protocol (VoIP) in Airport/Terminal		CNS rat.	-	-	-	-	-
COM12 - NewPENS		Pre-SWIM & SWIM	-	5.1.2 5.2.1	B1-SWIM	-	-
FCM08 – Extended Flight Plan		Pre-SWIM & SWIM	#37	4.2.3	B1-FICE	-	AM-1.4
INF07 - Electronic Terrain and Obstacle Data (e-TOD)		Pre-SWIM & SWIM	-	1.2.2	-	RMT.0703 RMT.0704 RMT.0722	-
INF08.1 - Information Exchanges using the SWIM Yellow TI Profile		Pre-SWIM & SWIM	#35, #46	5.1.3, 5.1.4, 5.2.1, 5.2.2, 5.2.3, 5.3.1, 5.4.1, 5.5.1, 5.6.1	B1-DATM B1-SWIM	-	AM-1.5

Level 3 Implementation Objectives	SESAR Key Feature	Major ATM change	SESAR Solution	DP family	ICAO ASBU B0, B1, B2	EPAS	AAS TP
INF08.2 - Information Exchanges using the SWIM Blue TI Profile		Pre-SWIM & SWIM	#28, #46	5.1.3, 5.1.4, 5.2.1, 5.2.2, 5.2.3, 5.6.2	B1-DATM B1-SWIM	-	AM-9.1
INF09 - Digital Integrated Briefing		Pre-SWIM & SWIM	#34	-	B1-DATM B1-SWIM	-	-
ITY-ACID - Aircraft identification		CNS rat.	-	-	-	-	-
ITY-ADQ - Ensure quality of aeronautical data and aeronautical information		Pre-SWIM & SWIM	-	1.2.2	B0-DATM	RMT.0722 RMT.0477	-
ITY-AGDL - Initial ATC air-ground data link services		Data link	-	6.1.1 6.1.3 6.1.4	B0-TBO	RMT.0524	AM-1.1
ITY-AGVCS2 – 8.33 kHz Air-Ground Voice Channel Spacing below FL195		CNS rat.	-	-	-	-	-
ITY-FMTP - Apply a common flight message transfer protocol (FMTP)		Pre-SWIM & SWIM	-	-	B0-FICE B1-FICE	-	AM-1.3
ITY-SPI - Surveillance performance and interoperability		CNS rat.	-	-	B0-ASUR	RMT.0679 RMT.0519	-

\* AOM21.1 was achieved in 2017 and FCM04.1 was achieved in 2018, therefore they were removed from the Implementation Plan 2018/2019. They are kept in this table for traceability purposes.

Legend:

Objective's link to SESAR Key Feature:			
	Optimised ATM Network Services		High Performing Airport Operations
	Advanced Air Traffic Services		Enabling Aviation Infrastructure

## D. Military Organisations Infrastructure

This Annex is not produced in 2019. It will be updated every second year, therefore it will be produced as part of the LSSIP 2020 document.

In case information is sought on military infrastructure, previous LSSIP may be made available upon request to the respective Focal Point and/or Contact Person.

## E. Glossary of abbreviations

This Annex mainly shows the abbreviations that are specific to the LSSIP Document for Bosnia and Herzegovina. Other general abbreviations are in the Acronyms and Abbreviations document in:

<https://www.eurocontrol.int/airial/>

Term	Description
<b>BH</b>	Bosnia and Herzegovina
<b>BHDCA</b>	Bosnia and Herzegovina Directorate of Civil Aviation
<b>BHANSa</b>	Bosnia and Herzegovina Agency for Air Navigation Services
<b>FAB-CE</b>	Central European Functional Airspace Block
<b>CCL</b>	Croatia Control Ltd.
<b>DPS</b>	Data Processing Systems
<b>ISIS Programme</b>	Implementation of Single European Sky In South East Europe
<b>MoD BH</b>	Ministry of Defence of BH
<b>SEP team</b>	Team for separation of regulatory and the service provision functions
<b>SES</b>	Single European Sky
<b>SEE FABA</b>	South East Europe Functional Airspace Block Approach
<b>SMATSA</b>	Serbia and Montenegro Air Traffic Service Agency
